

What does the Integration Leader do?

1. **Manage the chaos**

- Establish and run day-to-day integration mechanics, planning and implementation processes
- Coordinate all among and between all functional resources and work-streams

2. **Architect the successes**

- Provide focus and direction
- Identify and adopt best practices
- Ensure value preservation, capture, optimization

3. **Accelerate the process**

- Manage pace and momentum of the integration
- Push for timely decisions and actions
- Provide accountability for deadlines

4. **Personally drive the change**

- Issue identification and resolution
- Ambassador and lightning rod
- Communicate and connect
